AUTHOR RESPONSIBILITIES

REPORTING STANDARDS Authors reporting results of original research should present an accurate account of the work performed as well as an objective discussion of its significance. Where there are others who have participated in certain substantive aspects of the research project, they should be named in an Acknowledgement section. The corresponding author should ensure that all appropriate coauthors (according to the above definition) and no inappropriate co-authors are included in the author list of the manuscript, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication. All co-authors must be clearly indicated at the time of manuscript submission. Requests to add co-authors after a manuscript has been accepted will require approval of the editor.

DISCLOSURE AND CONFLICTS OF INTEREST All authors should disclose in their manuscript any financial or other substantive conflict of interest that might be construed to influence the results or their interpretation in the manuscript. All sources of financial support for the project should be disclosed.
